SUMMARY

CHAPTER I	INTRODUCTION	5
Section I.1	Reactor Control Systems	8
I.1.1	Control Rods	9
I.1.2	Long-Term Reactor Control	11
Section I.2	Burnable Poisons	14
CHAPTER II	PROPERTIES OF THE $\text{UO}_2\text{-Gd}_2\text{O}_3$ SYSTEM	26
Section II.1	Incorporation of Gadolinium on the UO_2 Fuel	27
Section II.2	Phases in the $\text{UO}_2\text{-Gd}_2\text{O}_3$ System	36
Section II.3	Other Relevant Properties	38
CHAPTER III	FABRICATION OF $\text{UO}_2\text{-Gd}_2\text{O}_3$ MIXED FUEL	44
Section III.1	Difficulties in Sintering $\text{UO}_2\text{-Gd}_2\text{O}_3$ Fuel	53
CHAPTER IV	DIFFUSION BARRIER HYPOTHESIS	64
Section IV.1	Hypothesis Proposal	65
Section IV.2	Experimental Bases for the Hypothesis	88
IV.2.1	Phases Studies in the $\text{UO}_2\text{-Gd}_2\text{O}_3$ System	88
IV.2.2	Interdiffusion Studies	111
IV.2.3	Conclusion Remarks	118
Section IV.3	Testing the Hypothesis	120
CHAPTER V	Gd_2O_3 PHASE TRANSFORMATION HYPOTHESIS	125
Section V.1	Hypothesis Proposal	126
Section V.2	Experimental Bases for the Hypothesis	129
V.2.1	Characterization of the Gd_2O_3 Phase Transformation	129
V.2.2	Rationale for the Hypothesis	130
Section V.3	Testing the Hypothesis	132
CHAPTER VI	STABLE PORE FORMATION HYPOTHESIS	135
Section VI.1	Hypothesis Proposal	136
Section VI.2	Experimental Bases for the Hypothesis	139
Section VI.3	Testing the Hypothesis	144
Section VI.4	Review of Reported Findings and of Literature under the Perspective of the Hypothesis	150

CHAPTER VII	TECHNOLOGICAL ANALYSIS	153
Section VII.1	Adjustment of the Sintering Cycle	154
Section VII.2	Adjustment of UO_2 Activity	159
Section VII.3	Development of Alternative Methods for Gd_2O_3 Incorporation to the Mixed Powder	162
